EDUCATION

Sarvajani College of Engineering and Technology

B.E. in Electronic and Communication Engineering

India

Aug. 2018 – July. 2022

PROJECTS

Esport-Connect | *React Native, Expo, Redux, Node.js, MongoDB*

- Developed an Hybrid Application using React Native and Expo
- Users can host the event for any e-sport tournament, and the players can participate in hosted events and provide reviews to the host
- Users can connect with other gamers and form teams.
- Used Node.js to Build the REST-API

Forem | *React, Redux, AntDesign, Node.js, PassportJS, MongoDB*

- Community base forum, user can post query on the platform and create categories and have discussion on it.
- Support reply for individual comments
- Used Google API for user login

Canteen | *React, Material UI, Redux, Node.js, MongoDB*

- Created a distance learning applications or online educational tools for Hackerearth Hackathon
- The App allow users to interact with a “classroom-like” environment. User can login as Student or Teacher
- Used Redux for state management and MongoDB as Database

Emaily | *React, Redux, Node.js, ngrok, PassportJS, MonogDb, Stripe API, SendGrid*

- A web app which can be used to send email to customers and customers can give feedback
- Used Stripe-API for payment handling
- Utilized SendGrid to send emails and receive feedbacks and ngrok to create a secure tunnel from a localhost to a locally running web service

Huckster | *React, Context API, Firebase, Firestore*

- E-commerce WebApp to buy and sell anything, where user can upload the details of product they want to sell and product get listed in Product section
- Implemented the state management using React Context-API
- Utilized Firebase for Authentication and Firestore for Database

Github Profile | *React, Github API*

- Show github profile of the user with their top repositories
- Used Github API to get the user data

TECHNICAL SKILLS

Languages: JavaScript, Node.js, Python, C, MongoDB, SQL, HTML/CSS

Frameworks: React, React Native, Redux, Express, Flask, Material-UI

Developer Tools: Git, Docker, VS Code, Markdown, Bash, Latex

INTERESTS

Reading, Videos Games, Chess, Cricket
