EDUCATION

Sarvajanik College of Engineering and Technology

B.E. in Electronic and Communication Engineering

India

Aug. 2018 – July. 2022

EXPERIENCE

Frontend Engineer Intern

Jan 2020 – Present

Habit

Remote

- Building stable and maintainable codebases using **React Native**
- Design reusable user interface components in **React Native** with **Typescript** and **ES6** features
- Creating new features, functionality, and capabilities on the app
- Responsible for creating reusable components
- Collaborated with designers to ensure designs were efficient and technologically sound
- Utilized **Redux** and **Redux-saga** for app state management

PROJECTS

Esport-Connect | *React Native, Expo, Redux, Node.js, MongoDB*

- Developed an Hybrid Application using React Native and Expo
- Users can host the event for any e-sport tournament, and the players can participate in hosted events and provide reviews to the host
- Users can connect with other gamers and form teams.
- Used Node.js to Build the REST-API

Emaily | *React, Redux, Node.js, ngrok, PassportJS, MonogDb, Stripe API, SendGrid* <https://github.com/bhavesht0206s/emaily>

- A web app which can be used to send email to customers and customers can give feedback
- Used Stripe-API for payment handling Implemented OAuth with Google API
- Utilized SendGrid to send emails and receive feedback and ngrok to create a secure tunnel from a localhost to a locally running web service

Forem | *TypeScript, React, Redux, AntDesign, Node.js, PassportJS, MongoDB*

- Community base forum, user can post query on the platform and create categories and have discussion on it. Support reply for individual comments
- Utilized TypeScript for the client side
- Implemented OAuth with Google API

Canteen | *React, Material UI, Redux, Node.js, MongoDB*

- Created a distance learning applications or online educational tools for Hackerearth Hackathon
- The App allow users to interact with a "classroom-like" environment. User can login as Student or Teacher
- Used Redux for state management and MongoDB as Database

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Node.js, Python, C, MongoDB, SQL, HTML/CSS

Frameworks: React, React Native, Redux, Jest, Express, Flask, Material-UI, Jest

Developer Tools: Git, Unit Testing, OAuth, Docker, VS Code, Markdown, Bash, Latex
