"The man who moves a mountain begins by carrying away small stones."

Summary

I am a third-year undergrad with interest in Full Stack Development. I am passionate about programming and have strong creative and problem-solving skills. Always curious to learn new things.

Education

Sarvajanik College of Engineering and Technology   *India*

B.E. IN ELECTRONIC AND COMMUNICATION ENGINEERING, CGPA: 7.5   *July. 2018 - Aug. 2022*

Projects

Esport-Connect (Github)

TOOLS: REACT NATIVE, REDUX, NODEJS, MONGODB

- Developed an Hybrid Application using React Native
- User can host the event for any e-sport tournament, and the players can participate in hosted events and provide reviews to the host
- Used NodeJS to Build the REST-API

Canteen (Github)

TOOLS: REACT, MATERIAL UI, REDUX, NODEJS, MONGODB

- Created a distance learning applications or online educational tools for a Hackathon
- The App allow users to interact with a "classroom-like" environment. User can signup as Students or Teacher
- Used Redux for state management ann MongoDB as Database

Emaily (Github)

TOOLS: REACT, REDUX, NODEJS, NGROK, PASSPORTJS, MONOGDB, STRIPE API, SENDGRID

- A web app which can be used to send email to customers and customers can give feedback
- Used Stripe-API for payment handling
- Utlized SendGrid to send emails and receive feedbacks and ngrok to create a secure tunnel from a locahost to a locally running web service.

Huckster (Github)

TOOLS: REACT, CONTEXT API, FIREBASE, FIRESTORE

- E-commerce WebApp to buy and sell anything, where user can upload the details of product they want to sell and product get listed in Product section.
- Implemented the state management using React Context-API.
- Utilized Firebase for Authentication and FireStore for Database

Forem - (In development) (Github)

TOOLS: REACT, REDUX, ANTDESIGN, NODEJS, PASSPORTJS, MONGODB

- Community base forum for everyone, user can post query on the platform and have discussion on it.
- Designed Reddit like reply section

Skills

Programming	JavaScript, NodeJS, Python, C
FrameWork / Libaray	React, Redux, React Native, Express, Mongoose, Flask
Database	MongoDB, PostgreSQL, MySQL, FireStore
Utils	Docker, Git, Markdown, Bash
